

# Protection from the sinister influences of all media.

Download all texts from the downloads to your smartphone and PC and leave them there.

[believe-it-or-not.de/downloads](http://believe-it-or-not.de/downloads)

They shield you from the demonic influences from the internet.

You will notice on the same day how things get better and continue to improve.

Recognize it in the little things of everyday life.

After downloading and saving the texts from the Downloads section to your technical devices, the demons that tempt people to sin, sorrow, and much evil will be inhibited and repelled by the texts, and this will change your life for the better.

Yes, some people won't believe it. That's just the pride of life, which prevents people from acting wisely when it's time to do so, when they are told to.

Or does the world look better now without such things?

No one has spiritual protection from the internet. New security concepts are developed every day that ultimately / often don't work, because they are purely aimed to secure people on a materialistic level. People think: there is only

what "I can see". Well, then there are also no viruses, because you cannot see them. Consequently, man must have no soul, because you cannot see it? In this case, there is no sin, since no one can see it, right? So, the following would also not exist:

2 Timothy 2:26 states: "...and that they may come to their senses and escape the snare of the devil, having been taken captive by him to do his will."

When people think, they have no sin, then they also think:

They do not need Jesus Christ as their Personal Saviour. Is such thinking true?

Please read John 8.

These are now intellectual challenges to 🕒 Think about it. I can't break down every pro and con and then summarize it as briefly as possible, but this is the possible short version.
